CUMULATIVE TABLE OF CONTENTS
VOLUME 4, 1983

ELECTRONYSTAGMOGRAPHY AND THE DIZZY PATIENT
Number 1, February 1983

Vertigo: History and Physical Examination, *B.T. Spofford*, 1
The Electronystagmography Test Battery and Interpretation, *D.L. Teter*, 11
The Electronystagmography Test Battery: Hit or Myth?, *D.M. Resnick and C.C. Brewer*, 23
The Vestibular System: Pediatric Considerations, *D.G. Cyr*, 33
Electronystagmography Findings in Patients with Acoustic Tumors, *F.H. Linthicum*, 47
Eye Movements: Nystagmus, Oscillations, Dissociative Deviations, *D.G. Pappas*, 55
Electronystagmography: Instrumentation Considerations, *D.L. Teter*, 71

THE NEUROAUDIOLOGICAL EVALUATION
Number 2, May 1983

Structure and Function of the Central Auditory System, *G. Thompson*, 81
Disorders of the Central Auditory System, *J.G. Neely*, 97
Strategies for Neuroaudiological Evaluation, *J. Jerger*, 109
Decision Matrix and Information Theory Analyses in the Evaluation of Neuroaudiological Tests, *S. Jerger*, 121
Neuroaudiologic Findings in Patients with Central Auditory Disorder, *S. Jerger and J. Jerger*, 133
Patterns of Acoustic Reflex and Auditory Brainstem Response Abnormality, *D. Hayes and J. Jerger*, 161
Normal Audiometric Findings, *J. Jerger and C. Jordan*, 173

SPEECH AUDIOMETRY
Number 3, August 1983

Diagnostic Applications of Speech Audiometry, *J.W. Hall*, 179
A Review of Tests of Speech Discrimination, *C.C. Brewer and D.M. Resnick*, 205
Factors Influencing the Validity and Reliability of Speech Audiometry, *C.A. Ostergard*, 221
Speech Audiometry with Infants and Children, *A.O. Diefendorf*, 241
Speech Audiometry for Hearing Aid Selection, *H.G. Mueller and A.M. Grimes*, 255
The Use of Speech Audiometry in Aural Rehabilitation, *P.A. McCarthy*, 273
The Use of Speech Audiometry in Determining Hearing Handicap in the Veterans Administration, *E.S. Wintercorn*, 287
Research Needs in Speech Audiometry, *R.E. Talbott and V.D. Larson*, 299
Tape Recordings and Tape Recorders: Their Care and Maintenance, *W.F. Carver*, 311
Compendium of Speech Audiometry Materials, *P.L. Corn*, 317

AUDITORY EVOKED POTENTIALS
Number 4, November 1983

Aspects of Averaging, *T.W. Picton, R.D. Linden, G. Hamel, and J.T. Maru*, 327
Masking and Bone Conduction Testing in Brainstem Response Audiometry, *B.A. Weber*, 343
Some Issues Relevant to the Measurement of Frequency-Specific Auditory Brainstem Responses, *M.P. Gorga and D.W. Worthington*, 353
Effects of Rise Time and Noise Masking on Tone Pip Auditory Brainstem Responses, *J.T. Jacobson*, 363

Olivopontocerebellar Degeneration: Effects on Auditory Brainstem Responses, *G.E. Lynn, P.A. Cullis, and J. Gilroy*, 375
Auditory Brainstem Response Testing in the Surgical Intensive Care Unit, *R.W. Keith, A.F. Jabre, and K.L. Heerse*, 385
Clinical Applications of the (Auditory) Middle Latency Response—An Overview, *F.E. Musiek and K. Donnelly*, 391
Auditory Evoked Middle Latency Responses: Current Issues, *P. Kileny*, 403
Electrophysiological Evaluation of Higher Level Auditory Processing, *K.C. Squires and K. Hecox*, 415

SEMINARS IN HEARING, VOLUME 4
AUTHOR INDEX

Brewer, CC, 23, 205
Carver, WF, 311
Corn, PL, 317
Cullis, PA, 375
Cyr, DG, 33
Diefendorf, AO, 241
Donnelly, K, 391
Gilroy, J, 375
Gorga, MP, 353
Grimes, AM, 255
Hall, JW, 179
Hamel, G, 327
Hayes, D, 161
Hecox, KE, 415
Heerse, KL, 385
Jabre, AF, 385
Jacobson, JT, 363
Jerger, J, 109, 133, 161, 173
Jerger, S, 121, 133
Jordan, C, 173
Keith, RW, 385
Kileny, P, 403

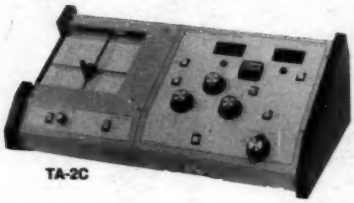
Weber, BA, 343
Wintercorn, ES, 287
Worthington, DW, 353

Need an impedance meter?
Teledyne Avionics offers a choice.

TA-4D



TA-2C

If you need a diagnostic instrument that can be easily transported, then your choice should be Teledyne Avionics' TA-4D.
- All standard testing capabilites including Tympanometry, Contralateral Reflex, Ipsilateral Reflex and Audiometric Screening.
- System expansion capability with accessory plotter.
- Economical and rugged.

If you need a clinical unit, then your choice should be Teledyne Avionics' TA-2C.
- All standard testing capabilities including Tympanometry, Contralateral Reflex, Ipsilateral Reflex, Reflex Decay, Eustachian Tube Function Test and tactual responses.
- Unique automatic pressure sweep.
- Convenient daily calibration of pressure and compliance.

Whether you need a diagnostic or clinical impedance meter, Teledyne Avionics offers a choice. These sophisticated instruments provide the digital and analog accuracy to perform critical diagnostic testing.

For specifications on the TA-4D or TA-2C and complete information on Teledyne Avionics' audiometers and ERA instruments, write:
